SPF SIG ARMVC Causal Factor Tool #1
Community Alcohol Retail Availability Summary

This form will allow you to summarize your community's alcohol retail availability. This should be done prior to collecting additional data on retail availability and promotion as you will need to identify these establishments to divide them (or a sample of them) among people doing environmental scans/research. The tool is divided by establishments that sell alcohol for off-premise consumption and those that sell for on-premise consumption.

<u>Off-premise Consumption</u>

1. How many alcohol sales outlets for off-premise consumption are in your community?

   _____ Liquor stores   _____ Grocery stores
   _____ Convenience stores   _____ Other. Describe:

2. What is the density of off-premise consumption outlets in your community? Specify definition(s) of density.

<u>On-premise Consumption</u>

3. How many alcohol sales outlets for on-premise consumption are in your community?

   _____ Taverns/Beer Bars   _____ Brewpubs
   _____ Restaurants   _____ Private Clubs
   _____ Other. Describe:

4. What is the density of on-premise consumption outlets in your community? Specify definition(s) of density.
